(SBU) Political Military Officer delivered the reftel points regarding Czech support for the consensus on the text agreed ad referendum at the conclusion of the November 19-20 meeting of the NSG Consultative Group in Vienna on December 11 to Mr. David Maseck, the MFA's Deputy Director for Non-Proliferation. Maseck said that he did not foresee any issues that would preclude Czech support for the consensus, but that the Nuclear Safety Office could still have some additional questions. He indicated that the Czechs might ask for a one-week extension to resolve these internal issues. He offered to check with his colleagues and provide us with an update as soon as possible.
